PROFESSIONAL SUMMARY

Proactive and flexible Data Science MSc student currently enrolled at University of Padova, passionate about translating complex data into actionable insights through AI prototyping. Proficient in Python and modern Machine Learning frameworks, with a solid statistical foundation for interpreting complex data. Experienced in Deep Learning implementation - Computer Vision, NLP, Times Series Analysis, Multimodal Learning. Demonstrates strong problem-solving skills to define AI software requirements and support decision-making, eager to apply analytical capabilities to real-world challenges in highly technological environments like Cyber Security and Defense.

EDUCATION

Università degli Studi di Padova <i>Master of Science in Data Science - English</i>	Padova, Italy <i>Present</i>
Università degli Studi di Firenze <i>Bachelor of Science in Statistics - Italian – Final Grade: 94/110</i>	Florence, Italy <i>Jul 2024</i>

SKILLS

Python, SQL, R, Stata, Git, PyTorch, TensorFlow, Scikit-Learn, Transformers, Huggingface, YOLO Ultralytics, Keras, Visual Transformers, Convolutional Neural Networks, Recurrent Neural Networks, Multilayer Perceptron, Decision Trees, AI Prototyping, Problem Solving, Proactivity, Flexibility, Statistical Analysis, Data Visualization, Matplotlib, Seaborn, Pandas.

PROJECTS

- **AI Prototyping for Real-Time Object Detection - Computer Vision:** Developed and evaluated Deep Learning architectures for real-time tracking using Python and PyTorch. Prototyped models comparing YOLOv11s - Ultralytics, RT-DETR - Visual Transformer, and Faster R-CNN - CNN. Conducted rigorous needs analysis regarding inference speed vs. geometric accuracy, defining software requirements to optimize real-world performance.
- **Time-Series Forecasting for Weather Data:** Designed a Deep Learning model - Seq2Seq GRU/RNN in PyTorch to predict 76 variables. Conducted statistical analysis and created visualizations to interpret multivariate trends, demonstrating strong problem-solving in complex data contexts.
- **Image Classification System:** Built a custom Convolutional Neural Network - CNN and Multilayer Perceptron - MLP from scratch achieving 87% accuracy. Managed the full data pipeline from preprocessing to model validation, solving a real-world classification problem.
- **Automation & Optimization - Maximum Clique Problem:** Developed a Python algorithm to solve complex optimization problems. Enhanced process automation, achieving a 30% reduction in execution time on DIMACS datasets, demonstrating proactive improvement of analytical standards.

WORK EXPERIENCE

Modus S.r.l <i>Market Data Collector / Interviewer</i>	Florence, Italy <i>Sep 2023 – Feb 2024</i>
• Collected and managed primary data for market analysis through 300+ quantitative interviews. • Collaborated with cross-functional teams to synthesize findings, demonstrating flexibility and effective communication skills in a fast-paced environment.	
Guelfi Firenze American Football Team <i>Quarterback - Team Leader</i>	Florence, Italy <i>Jan 2017 – Jan 2020</i>
• Won the Italian Champion title - U16. Demonstrated commitment to ambitious results, leadership, proactivity, and ability to thrive in a collaborative team environment.	
Liberty Recycling Training & Development <i>Shop Assistant - Volunteer</i>	Dublin, Ireland <i>Jun 2019 – Jul 2019</i>
• Managed point of sale systems and assisted in daily operational tasks.
